SUMMARY

Frontend Developer with nearly a year of experience building dynamic UI components using Angular, HTML, CSS, JavaScript, and TypeScript. Skilled in responsive design, RESTful API integration, and Agile/Scrum collaboration, delivering pixel-perfect interfaces from Figma designs. Currently expanding expertise in React and Next.js through personal projects.

SKILLS

Frontend Development: HTML, CSS, JavaScript, TypeScript, Angular, React, Tailwind CSS, Bootstrap, Jasmine(Angular Unit Testing), NextJS

UI/UX Design: Figma

Version Control: Git and GitHub

PROFESSIONAL EXPERIENCE

Associate Software Engineer

July 2024 - June 2025

MapleLabs Solutions Private Limited (A Xoriant Company)

- Built and maintained UI components using Angular, TypeScript, HTML, and CSS for a data visualization platform with over 95% of variables strongly typed.
 - Integrated a client-specific UI component library with strong typing and Jasmine unit tests, maintaining a minimum code coverage of 70% to ensure application quality.
 - Translated Figma mockups into pixel-perfect, design-system-compliant interfaces and integrated RESTful APIs to deliver dynamic, real-time data.
 - Identified and mitigated potential application risks through manual testing and implemented robust logic to prevent recurrence.
 - Collaborated in Agile sprints with designers, backend developers, and QA to deliver and refine features, resolving UI bugs using debugging tools.
-

PROJECTS

HireLens | An AI Resume Analyzer

Technologies: React, Tailwind CSS, TypeScript, Puter.js

Responsive AI Resume Analyzer built with React, TypeScript, Tailwind CSS, and Puter.js to score and provide category-wise feedback on resumes using serverless authentication, cloud storage, and AI integration.
